Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-64, drawn to a biological assay, classified in class 435, subclass 4.

5 II. Claims 65-108, drawn to a biochip, classified in class 422, subclass 50, also 435/288.5 and 257/3.

The inventions are distinct, each from the other because:

10 Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and
15 materially different process. (MPEP § 806.05(e)). In this case the method could be practiced with other apparatus.

20 Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

25 Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
